ABSTRACT

Homestay is a popular form of hospitality and lodging whereby visitors sleep at the residence of a local of the city to which they are traveling. The length of stay can vary from one night to over a year and can be free, in exchange for monetary compensation, in exchange for a stay at the guest's property either simultaneously or at another time (home exchange), or in exchange for housekeeping or work on the host's property. In this dissertation an Android app is to be developed for Homestays of Sikkim where Homestays will be organized in four district of Sikkim. Users can view, book homestays and do the payment online. An Admin section will be developed wherein Adding, Updating and Deleting of Homestays will be performed. Efficient and Effective User Interface is to be developed. Payment Gateway will also be integrated along with good Business model. If time permits than a strong and secure control panel is to be made to maintain and calculate the revenue of this Application.
